

# **System Requirements**

Revised November 30, 2022

---

The following minimum specifications are recommended to create an optimal, low-latency experience using MyTime's cloud-based Scheduler and Point of Sale application. MyTime may still be accessed and function on devices that don't meet these minimum specs, but the overall user experience could be impacted.

## **INTERNET CONNECTIVITY**

30+ Mbps dedicated high-speed connection for real-time syncing with server and integrated credit card processing. Cabled and local area networks provide the most stability.

## **WEB APPLICATION**

Processor: Core i7 processor or higher  
RAM: 8GB of RAM (16 GB preferred)  
Hard Drive Space: 1GB

## **iOS (iPad, iPhone)**

OS: iOS 13.0 or later  
App Size: 35.9 MB

## **ANDROID (Tablet, Mobile)**

OS: Android 5.0 (Lollipop) or later  
App Size: 44 MB
