

How To Set Up Your iCMP Chip Card Reader

How To Set Up Your iCMP Chip Card Reader

(iCMP + MyTime + iOS)

1

Please add your iCMP device on the settings page of your MyTime account. You'll need to do this on the internet browser version of MyTime, not through the iOS app itself:

Business Setup > Settings > Scroll down to the POS section

POS 4270 August Lane

Payment Terminal Management

Joshua, 17139PP83071207 (Device ID: GT10001396398) [Edit](#) | [Uninstall](#)

Gabriel, 17139PP83071427 (Device ID: GT10001396411) [Edit](#) | [Uninstall](#)

Billy, 17172PP21210288 (Device ID: GT10001396661) [Edit](#) | [Uninstall](#)

[Add Payment Terminal](#)

Enter device information:

Location: Select your location

Model: Ingenico iCMP

Serial number: Found on the back of the iCMP and usually looks like:
12345PP12345678

Name: Any name

Add Payment Terminal X

Location SF 18th St

Model Ingenico iPP 320

Serial Number 0000000000000000

Name Pinpad 1

Display Message Welcome

[Cancel](#) [Save](#)

- 2 Turn bluetooth on in your device settings of your iPad or iPhone:
Settings > Bluetooth

- 3 Turn on your iCMP by pressing the power button on the right side of the device
Make sure iCMP is charged, if not - plug it in with the micro USB charging cable

- 4 The iCMP will display a “BT Pairing required” message

- 5 Select “iOS” option by pressing F1 button on the iCMP

6

After few seconds iCMP will display list of available devices. Navigate down the list with F2 and F3 buttons, select your device by pressing the green  button

7

iCMP will display its name and PIN required for Bluetooth pairing

8

The iCMP dialog screen will appear on your iOS device asking for a PIN (sometimes the iCMP won't appear immediately on the list of available devices, if it's not happening for a long period of time, try to toggle Bluetooth button off and then turn it on)

9

Enter PIN and press “Pair”

Your iCMP device should then display “This Lane Closed” message

The iCMP name will appear on your iOS device in the list of Bluetooth devices with status “Connected”
